

2015 NCB-ESA Meeting - Program Symposia

1. Plant-aphid Interactions in the “omics” Era: What Can We Infer from Different Model Systems?
Joe Louis
2. Ecology and Control of Disease Vectors
Lee Cohnstaedt, Alice Harris
3. What Are the Costs and Benefits for Neonicotinoid Seed Treatments in Field Crops?
Erin Hodgson, Matt O’Neal
4. Urban Entomology at the Interface of Basic and Applied Sciences
Ameya Gondhalekar, Grzesiek Buczkowski
5. Forest Entomology in the North Central Branch
Todd D. Johnson, Linnea Meier, Joseph Wong
6. Little Microbes Big World: Demonstrating the Role That Symbionts Play in Nature
Paul Lenhart, Jennifer White
7. Entomology Literacy: Research in the Human Dimensions of Entomology Education and Extension, Citizen Science
Doug Golick, Louise I. Lynch
8. Corn Rootworm Management: Working Together for Change
Roxanne Fegley
9. How Fundamental Research Contributes to Improving Biological Control Programs
Jim Nechols
10. The Emerging Stink Bug Problem in the North Central Region
Andy Michel, Raman Bansal
11. Potential of RNAi Technology in Entomology
Shripat T. Kamble
